About me

Senior Flutter Developer with **4+ years** of production experience delivering scalable, high-quality mobile applications with **complex animations** and modern UI/UX. Proven ability to lead **architecture** decisions, **mentor teams**, and deliver measurable impact — including **20% growth** in onboarding conversion and **35% reduction in bug rate**. Experienced in end-to-end product ownership.

Skills:

Languages & Frameworks: Dart, Flutter, Swift, SwiftUI, TypeScript, React, React-Native, Angular

Architecture & State Management: BLoC, Cubit, MobX, Redux, MVVM, Clean Architecture

Networking & APIs: REST APIs, GraphQL, WebSockets, dio, retrofit, Firebase, OAuth2, Postman, Swagger

Other: get_it, injectable, go_router, Git (GitHub, GitLab), Figma, Katalon Studio, Unit/Integration/Golden Tests

Practices: Agile, Scrum

Achievements:

- Integrated **Appodeal** into a **production app**, enabling in-app advertising and launching its first revenue stream
- Developed an iOS app using **Swift**, **SwiftUI**, and **SceneKit** — built interactive **3D** experience from scratch
- Increased onboarding conversion **by 20%** through implementing flow with contact sync (Corgi)
- Integrated **Amplitude-analytics** service for user-events tracking (Corgi)
- Lowered feature development **cost by 15% by** introducing scalable architecture patterns (ICT Group)
- Improved code quality and reduced code review **time by 30%** via company-wide **linter config** (ICT Group)
- Conducted **15+ Flutter tech interviews**; participated in team hiring process
