About me

For the past 2 years, I've been working with **Flutter**. Prior to that, I spent around 2 years developing frontend applications using **React/React-Native**. I single-handedly developed an application for utility bill payments in Mongolia, named BPay, which is now integrated into all the major applications in the country (banking/government).

Skills

Main stack: Dart, Flutter, BloC (Cubit), dio, retrofit, get_it, go_router, Clean Architecture, RESTful api, GraphQl, Firebase, git.

Also (minor): Swift, SwiftUI, SceneKit, TypeScript, React, Angular, React-Native, Redux-Toolkit.

Education

Currently, I study at Saint-Petersburg Polytechnic University at Computer Since faculty on distance education format.

Experience (>4 years)

FLUTTER DEVELOPER at Picnic, Saint-Petersburg, Russia - September of 2023 - Currency

Picnic App - UGC social-media platform. The app includes interest-based communities where users can share thematic content and make new friends. **(Dart, Flutter).**

Comet - AI gameplatform. I developed this project from scratch using **Swift** and **SwiftUI**. The application involved interaction with 3D objects, which I implemented using **SceneKit**.

Tadpole - A system that helps businesses optimize AWS costs. The application is a dashboard where users can connect their AWS account. It analyzes expenses and the resources required for tasks and provides recommendations for cost optimization. (**TypeScript**, **Angular**).

Corgi - Corgi is an aggregator of insurance companies with AI integration. This startup project raised $5,000,000 during the first round of investments. With this application, users can select the best insurance companies for their homes, pets, or employees.
(**TypeScript**, **Angular**, **Dart**, **Flutter**).

FRONTEND DEVELOPER at ICT Group, Ulaanbaatar, Mongolia
— **April of 2022 - August 2023**

I developed government services using **TypeScript, React, React-Native, Dart, Flutter.**

REACT / REACT-NATIVE DEVELOPER at Edelen, Saint-Petersburg, Russia — **April of 2021 - March of 2022**

I developed websites and few of mobile applications using **TypeScript, React, Next, React-Native, Redux-Toolkit.**

WEB DEVELOPER at Tellsy, Moscow, Russia — **August of 2020 - April of 2022**

I developed websites and landings using **HTML, CSS, JavaScript, WordPress, Elementor.**
