Bio

Hello! My name is Ivan and I am a Mobile Flutter developer. Currently, I develop government services in Mongolia using Flutter and React-Native.
If you're seeking a dedicated Flutter developer who can bring your app ideas to life and create polished, intuitive mobile experiences, I would love to discuss how my skills and expertise can contribute to your project's success.

Skills

Dart, Flutter, BloC (Cubit), Clean architecture, dio, freezed, RESTful api, third-party libraries, Firebase (Push Notifications, Database, Realtime Database etc.), Git, GitHub, GitLab, TypeScript, React, React-Native, Redux-Toolkit.

Experience

MOBILE DEVELOPER, ICT GROUP, ULAANBAATAR, MONGOLIA – APRIL OF 2022 - AUGUST 2023

Develop government mobile applications using Dart, Flutter, BloC (Cubit), TypeScript, React-Native, Redux-Toolkit.
Applications:
1) **Digital UB**   - a comprehensive application for the residents of the capital city.
2) **Digital Province** - a series of mobile services for Mongolian provinces.
3) **BPay** - An app, for paying utility bills, that is integrated into all of Mongolia's biggest apps.
4) **Acurr App** - Application for insurance processing.
5) **React Core** - A system, for internal company use, a mobile application builder that updates ui applications in real-time mode.
