About me
Flutter Engineer with 6+ years of production experience building and delivering complex cross-platform applications. Experienced in end-to-end feature ownership, architecture design, **native iOS integrations**, **platform channels**, **real-time communication**, and **VPN integration** with **WireGuard**.

Built applications for **iOS**, **Android**, **macOS**, **Windows**, **Linux**, and **Web**, including projects developed from scratch with full ownership of technology stack and architecture. Strong focus on maintainable architecture, debugging complex cross-layer issues, automated testing, and production reliability.

Skills
Core: Dart, Flutter, BLoC, Cubit, Clean Architecture, MVVM

Native & Cross-platform: Swift, SwiftUI, SceneKit, Platform Channels, iOS, Android, macOS, Windows, Linux, Web

Networking & Security: REST APIs, GraphQL, WebSockets, long-polling, WireGuard VPN integration, OAuth2, OIDC, JWT, Secure Storage

Data & Infrastructure: Drift, SQLite, Firebase Cloud Messaging, dio, retrofit, get_it, injectable, go_router

Testing & Tooling: Unit Tests, Integration Tests, Golden Tests, Katalon Studio, Git, GitHub, GitLab, Postman, Swagger, Figma

Additional: TypeScript, React, React Native, Angular

Experience (6 years)

- **Senior Flutter Developer, NDA** | 06/2025 - Currently
  - Owned the architecture and end-to-end development of a cross-platform corporate workspace application for **iOS**, **Android**, **macOS**, **Windows**, **Linux**, and **Web**.
  - Implemented **offline data storage and security**: **Drift**, **Secure Storage**, **Firebase Cloud Messaging** for push notifications, local notifications, and secure file handling.
  - Implemented real-time communication using long-polling, including reconnection/ recovery/error-handling.
  - Conducted 15+ technical interviews for the Senior Flutter Developer position.

- **Senior Flutter Developer, Corgi** | 09/2023 - 06/2025
  - Developed mobile applications from scratch, selecting the technology stack and defining the architecture **(Clean Architecture, MVVM).**
  - Developed a cross-platform **WireGuard** VPN application for **iOS**, **Android**, and **macOS** using Flutter, integrating backend-provided VPN configurations and connection

lifecycle management across supported platforms.
- Implemented **3D interaction features**, including fully interactive **game character editing** with **randomization, undo, and redo functionality**, using **SceneKit** with **Swift and SwiftUI**.

- Integrated **Appodeal SDK** for showing ads in the application
- Introduced additional automated testing with **Katalon Studio, r**educing the number of uncaught bugs by **35%.**

- **Mobile Developer, ICT Group** | 04/2022 - 09/2023
  - Developed government applications using Dart, Flutter, React, React-Native, TypeScript.
  - Introduced the practice of using linter for projects. That reduced code review for 30%
  - Single-handedly developed BPay application for bill payments. This application now integrated into all major applications in the country: government and banking.
- **Frontend Developer, Edelen |** 04/2021 - 04/2022
- **Web Developer, Tellsy |** 08/2020 - 04/2021

Education:
B.Sc. in Computer Science (in progress) — Saint-Petersburg Polytechnic University (remote)
